Some Notes on Demonstrative Adjectives:

1) Like other adjectives they modify nouns in gender, number and case.

Priya *illam ranam amat.* Priya loves that frog.

2) Demonstrative adjectives are often used as substantives:

Antara *illōs in mare iecit.* Antara threw those men into the sea.

Marcus illa ēgit. Marcus did those things.

3) Demonstrative adjectives can function as **pronouns**, which will agree with an antecedent in **gender and number only**.

Di magnum virum ex caelo miserunt. Hic est vir pietatis virtutisque.

Dea duos gladios fert. Ille est acutus. Hic est obtusus
